

Spread the Word...

Book Signing with Cherie McCoy

“My intention throughout my writing of this book has been mainly to spread the word of how important it is to search the body for its truth, resulting in the release of pain, old memories and unconscious behavioral problems. My hope is that this not only helps bring clarity concerning the tools and methods of Self Acceptance Training to those that I have worked with in the past, but also helps to bring the

work to new seekers that have not yet discovered the incredible liberation that this work offers.” - Cherie McCoy
